

Beeresh Muragannavar

Software engineer

Nargund, India | 9741207665 | beereshmuragannavar2005@gmail.com | <https://www.linkedin.com/in/beeresh-muragannavar> | <https://github.com/Beeresh01/>

SUMMARY

Passionate Computer Science Engineering student with hands-on experience in C++, Python, web development, and AI/ML. Skilled in building practical, AI-driven projects with strong problem-solving and learning abilities. Eager to apply technical skills to real-world challenges and grow as a software developer.

EXPERIENCE

Intern
Mohamed Ismail
Completed Python Internship at Besant Technologies, gaining practical knowledge of Python programming and strengthening problem-solving skills through hands-on learning and real-world applications.

Dec 2025 - Jan 2026
Bangalore

EDUCATION

Computer Science & Engineering -: 8.16
S G Balekundri Institute Of Technology
VTU University

Sep 2023 - Present
Belagavi

12th board - Science - Percentage: 93.5
Govt. PU college

Jul 2021 - Apr 2023
Nargund

Secondary School - Percentage: 87
Lions English Medium School

Jun 2020 - Mar 2021
Nargund

PROJECTS

AI-BASED OFFLINE NAVIGATION & OBSTACLE ALERT APP
<https://github.com/Beeresh01/>

- AI-powered mobile application designed to assist visually impaired users with real-time obstacle detection.
- Uses computer vision and YOLO to identify obstacles and provide voice-based alerts
- Tech:** Python | YOLO | Computer Vision | AI/ML

Apr 2026 - Aug 2026

VISURA - OFFLINE CLINICAL AI ASSISTANT | CodeClipse 24-Hour Hackathon
<https://github.com/Beeresh01/>

- Developed an offline clinical AI system using VLM + RAG on Raspberry Pi for image-based condition identification and protocol retrieval.
- Built FastAPI + React PWA with voice interaction and WHO-verified medical knowledge retrieval.
- Tech:** Raspberry Pi | VLM | RAG | FastAPI | React | FAISS | Whisper

Apr 2026

PHISHING WEBSITE DETECTION SYSTEM
<https://github.com/Beeresh01/>

- Machine learning system that detects and classifies phishing websites using URL and website features.
- Built a Flask-based web application for real-time phishing detection.
- Tech:** Python | Machine Learning | Scikit-learn | Flask

Aug 2025 - Sep 2025

SKILLS

- C++, Python, JavaScript, Kotlin
 - MySQL, Firebase
- Flask, REST APIs, PHP
 - Machine Learning, Scikit-learn, YOLO
- HTML, CSS, React.js
 - Git, GitHub, VS Code

LANGUAGES

- English
 - German
- Kannada
- Hindi
